Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the terminology "stop portion being spaced from the cutting portion along the shaft" is not found in the specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ferrante et al. (USPN 5,176,684).

4. Ferrante discloses a medical bur for cutting bone comprising a handle; a shaft (64); a bur head (22) having a cutting portion (68), and a stop portion (66) along the shaft that is fixed with respect to the cutting portion. (The bearing sleeve (66) acts as a stop in that it will stop the bur when the bearing sleeve reaches the end of the guide channel (22). The cutting portion is located between the handle and the stop portion and exhibits symmetry about its longitudinal axis, which is aligned with the longitudinal axis of the shaft. The stop portion is spaced from the cutting portion to permit

Art Unit: 3731

independent movement of the cutting portion with respect to the stop portion (Col 5, line 24). The cutting portion rotates under power to cut through bone while the stop portion rotates freely and is *capable* of preventing contact of the cutting portion with soft tissue located adjacent the bone being cut. The proximal edge of the stop portion corresponds to the size and shape of the distal edge of the cutting portion. The bur head is spherical and the stop portion is shaped as a portion of the sphere.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
